Career Objective

Backend developer with strong Node.js and Python fundamentals, building Express.js APIs, MongoDB-backed features, authentication, and tracking. Interested in problem solving, competitive programming, and creative backend solutions.

Skills

- **Programming Languages:** JavaScript, TypeScript, Python, C++, C
- **Database:** MongoDB (NoSQL), MySQL (SQL)
- **Tools:** Git, Github, Postman, Firebase, Vercel
- **Frontend:** React, Next.js, Redux Toolkit, Tailwind CSS
- **Backend:** Node.js, Express.js, REST API development

Experiences

Dublin 4IR

Jr. Backend Developer | April 2026 – Present

Designed Node.js/Express.js APIs, MongoDB schemas, and backend architecture; integrated AI features, deployed services, resolved production issues, and supported internal IT.

Backend Developer Intern | Jan 2026 – April 2026

Built FineAnswer authentication and application-tracking APIs with Node.js/Express.js and MongoDB; supported Git, deployments, and React work with cross-functional teams.

Projects

VisaRelay | [Live](#)

An Irish visa decision monitoring platform for applications handled by the New Delhi Visa Office.

❖ Built a Node.js checker that parses published ODS lists, detects new decisions, matches tracked numbers in MongoDB, and emails verdicts and corrections.

❖ Developed student signup and agency dashboards with Google or email-code sign-in, prepaid seats, digest emails, and EPS checkout.

Technology Used: Next.js, TypeScript, Node.js, MongoDB, Resend, EPS, Vercel, DigitalOcean

FineAnswer | [Live](#) | [Repo](#)

A full stack study-abroad platform with student and admin dashboards for program discovery and application tracking.

❖ Built authentication and APIs for profiles, progress tracking, success stories, and blog management.

❖ Developed responsive React pages and integrated Firebase sign-in, MongoDB, and Vercel deployment.

Technology Used: React, Node.js, Express.js, MongoDB, Firebase, Vercel

AIBN Chartered Accountants | [Live](#) | [Repo](#)

A Next.js accounting practice site with a client portal, admin dashboard, enquiries, and Irish tax tools.

❖ Built calculators for income tax, VAT, corporation tax, CGT and CAT with editable rates and review workflows.

❖ Implemented protected client enquiries, message threads, and admin responses with Supabase authentication and PostgreSQL.

Technology Used: Next.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS

Problem Solving Skills

❖ I have solved around 120+ problems on various websites. [Codeforces](#) | [Leetcode](#)

Education

Bachelor of Science in Computer Science | 2022 – 2026

[BRAC University](#) (Dhaka, Bangladesh)

Language Proficiency

❖ English (Fluent), Bangla(Native)
